

HONEY BEE™ AEROGEL
'SPARKLE' AIR FRESHENER
by Cee-Bee®

d a t a s h e e t

HONEY BEE AEROGEL AIR FRESHENER is an elastomeric rubber gel that provides a consistent, long-lasting fragrance in aircraft lavatories, cabins and galleys. Unlike the traditional polyester disc which allows free evaporation of fragrance oils, Aerogel encapsulates a higher level of fragrance and controls the release to deliver a consistent, pleasant fragrance. Aerogel is packaged in a tamper-proof polypropylene cup, which allows the disc to be handled without contacting the gel and eliminates fragrance oil deposits on the hands and lavatory walls.

BENEFITS

- Long-lasting, consistent release of fragrance.
- Eliminates the offensive, high initial fragrance release of traditional polyester discs.
- Non-toxic gel material encapsulates higher level of perfume oil.
- Plastic cup design eliminates the need to touch the actual disc.
- Eliminates perfume oil deposits on hands and aircraft lavatory walls.

NOTES PRIOR TO HANDLING

Before using any McGean product, all safety and operating instructions should be read and understood. If you have any questions, please contact your McGean representative before proceeding.

USE PROCEDURES

Remove disc from packaging and place in disc holder. Disc holder should be positioned on wall as high as possible above or near lavatory door. Airflow in the lavatory will effectively disperse the fragrance in the disc.

PROPERTIES

- Fragrant Gel in Plastic Holder.

SAFETY & HANDLING

- Direct skin or eye contact with the gel itself may cause irritation.
